

FIRMWARE UPDATE RELEASE DETAILS

OC1

Watch Dive Computers

to version 1E04

(from any previous version)

EXPLANATION

In response to input received from users of the OC1, Oceanic has modified the following items to improve the OC1's operation:

- Improved the contrast of the LCD which displayed the segmented digits and icons slightly dimmer than the dot matrix portion.

UPDATE PROCESS

Units affected are the OC1 containing previous firmware revisions.

In the event that you have experienced the above, or you want to be sure it doesn't occur, you can update your OC1's firmware (operating software program) to newly released revision 1E04 using the *Check for new Firmware Update* feature of the current version of the OceanLog PC interface program. There is no need to return the unit to Oceanic.

OceanLog is available on the www.oceanicworldwide.com web site.

Should you have any questions, please contact your Authorized Oceanic Dealer, or Oceanic Customer Service by calling 800-435-3483 (8AM -5PM, PST Monday - Friday) or send an email to service@oceanicusa.com.
