

FIRMWARE UPDATE RELEASE DETAILS

VEO 1.0

Dive Computers

to version 1D

(from any previous version)

EXPLANATION

In response to input received from owners and users of the VEO 1.0, Oceanic has corrected or modified the following items to improve the VEO 1.0's operation:

- Corrected display of Max Depth on the Surface Alternate (Last Dive) screen which showed a phantom depth instead of the actual Max Depth of the previous (last) dive.
- Removed display of Date from the Log Preview screen. The VEO 1.0 model does not feature Date.

UPDATE PROCESS

Units affected are the VEO 1.0 model containing any previous version firmware.

In the event that you have experienced any of the above, or you want to be sure they don't occur, you can update your VEO 1.0's firmware (operating software program) to newly released revision 1D by taking the module to your Authorized Oceanic Dealer for processing of an update.

Should you have any questions, please contact your Authorized Oceanic Dealer, or Oceanic Customer Service by calling 800-435-3483 (8AM -5PM, PST Monday - Friday) or send an email to service@oceanicusa.com.
