

## **FIRMWARE UPDATE RELEASE DETAILS**

### **VEO 3.0**

**Dive Computers**

**to version 1C**

**(from any previous version)**

### **EXPLANATION**

In response to input received from owners and users of the VEO 3.0, Oceanic has corrected or modified the following items to improve the VEO 3.0's operation:

- Corrected display of Max Depth on the Surface Alternate (Last Dive) screen which showed a phantom depth instead of the actual Max Depth of the previous (last) dive.

### **UPDATE PROCESS**

Units affected are the VEO 3.0 model containing any previous version firmware.

In the event that you have experienced any of the above, or you want to be sure they don't occur, you can update your VEO 3.0's firmware (operating software program) to newly released revision 1C using the *Check for new Firmware Update* feature of the current version of the OceanLog PC interface program. There is no need to return the unit to Oceanic.

*OceanLog is available on the [www.oceanicworldwide.com](http://www.oceanicworldwide.com) web site.*

Should you have any questions, please contact your Authorized Oceanic Dealer, or Oceanic Customer Service by calling 800-435-3483 (8AM -5PM, PST Monday - Friday) or send an email to [service@oceanicusa.com](mailto:service@oceanicusa.com).
